## EDUCATION

### The University of Lahore

Bachelor of Science in Computer Science | CGPA: 3.72/4.00

Lahore, Pakistan

Feb 2024 – Feb 2028 (Expected)

## EXPERIENCE

### Decode Labs

May 2026 – June 2026

Full Stack Development Intern

Remote

- Working on full stack development projects within a government-registered enterprise, completing milestones under mentor-led guidance.
- Participating in structured sessions to gain hands-on industry experience in full stack development.

### CodeAlpha

May 2026 – June 2026

Full Stack Development Intern

Remote

- Applying full stack skills through real-world project assignments with an emphasis on deeper conceptual understanding.
- Engaging in orientation and mentorship to build industry-ready development practices and professional workflows.

### Hex Softwares Pvt. Ltd.

May 2026 – June 2026

Web Development Intern

Remote (WFH)

- Contributing to web development projects by applying trained skills to practical, production-oriented deliverables.
- Developing a deeper understanding of industry workflows and preparing for future full-scale engineering roles.

## PROJECTS

### Skill Exchange App | Next.js, TypeScript, Node.js, PostgreSQL, Prisma, Redis, Socket.io, BullMQ April 2026

- Architected a production-grade full-stack barter marketplace across 13 pages — public, authenticated dashboard, real-time swap workspace, and admin panel — using Next.js 14, TypeScript, and Node.js.
- Used Prisma ORM with PostgreSQL for type-safe database access and schema migrations; implemented Socket.io for real-time chat, typing indicators, and swap status updates decoupled from serverless Vercel.
- Built a BullMQ + Redis job pipeline for time-sensitive background tasks: session reminder emails, review prompts, and automatic swap expiry logic.

### Store Management App (BinHayat) (Live Link) | React.js, Tailwind CSS, Supabase, PostgreSQL April 2026

- Developed a full-stack business management app for a retail dollar store with real-time inventory and sales tracking using React.js and Tailwind CSS for a responsive, mobile-friendly UI.
- Integrated Supabase as the BaaS layer providing a real-time PostgreSQL database, authentication, and instant data sync across sessions.
- Delivered a production-ready, Vercel-deployed tool that streamlined day-to-day store operations and eliminated manual recordkeeping overhead.

### Study Planner (Live Link) | HTML, CSS, JavaScript, LocalStorage April 2026

- Built a frontend study planning app with pure HTML, CSS, and JavaScript — no frameworks — enabling students to organize and track study sessions efficiently.
- Implemented persistent data storage via the browser's LocalStorage API, retaining user plans across sessions with zero backend dependency.
- Designed a clean, intuitive UI demonstrating strong foundational web skills and attention to usability without any external libraries.

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, TypeScript, Python, C++, C, SQL

**Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, Spring Boot, TailwindCSS, Bootstrap, Material UI, ShadCN, Aceternity UI, Chakra UI

**Databases:** PostgreSQL, MySQL, Supabase, Firebase, Redis, H2

**Developer Tools:** Git, GitHub, Docker (basic), Vercel, Netlify, Figma, Postman, Agile (Scrum)

**Other:** REST APIs, WebSockets (Socket.io), Prisma ORM, BullMQ, JWT Authentication, Spring Security, CI/CD basics
